

Three Ways to Set-Up Course Readings in Oncourse

There are several ways to incorporate course readings into Oncourse. Three main ways to do this include: Citation Linker, Selected Readings (E-Shelf), and Course Reserves

Citation Linker

Citation Linker can serve as an alternative to using University Library’s course reserve system. This tool allows faculty to create article lists using library resources.

Citation Linker is available in the Resources section of Oncourse. To activate Citation Linker select ‘Options’ from the Site Resources menu.

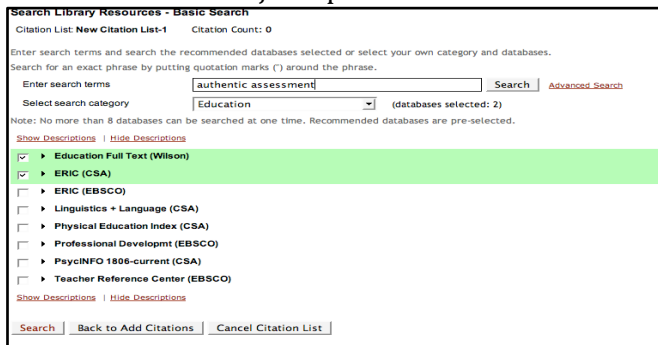

Add a Citation List in the same way you add other items to Resources. ‘Add Citation List’ will appear in the drop-down ‘Add’ menu in Resources.

There are three ways to search for articles.

1. Search Library Resources
2. Search Google Scholar
3. Create New Citation (by typing in the citation information)

1. Search Library Resources.

Users can search subject-specific databases for articles to add to the Citation List

From the list of results you can add an article to your Citation List, simply click 'Add'.

2. Search Google Scholar

Once you select this option Google Scholar will open in a new menu, with instructions on how to add citations. Note: this will only work for items available through the IUPUI Libraries. Google Scholar may not pull the full citation, so double check that information.

3. Create New Citation-Allows you to create custom citations for your own work or for other works.

Select the citation type from the drop-down menu

1. Journal Article
2. Book
3. Book Section
4. Report
5. Unknown

Type in as much as the citation information as you can.

Once you are done, the Citation List will look like the one below. To save the list click 'Continue'. You can always go back and add citations or remove citations at any time!

Benefits:

- A major benefit to linking to course readings through Citation Linker is that you do not need to worry about copyright, because you are linking out to full-text articles available through the library.
- Citation Lists can be used like any other resource in Oncourse-it can be attached to syllabi, assignments, announcements, or the schedule. When you save the Citation List you determine the availability, access, and name the list.
- You can make multiple citation lists depending on how you want to group your readings (assignment, topic week).

Limitations:

- Currently Citation List does not work well for books including e-books. Citation List will work best with journal articles available full-text online through the IUPUI Libraries.

Selected Readings (E-Shelf)

This tool utilizes MetaSearch (available through the University Library website) to link to journal articles; it can serve as an alternative to using University Library's course reserve system. Search for, and select articles using the MetaSearch search engine, then add the articles to your Oncourse page.

To get started: go to the IUPUI University Library homepage (www.ulib.iupui.edu). Under Research→Find Articles→MetaSearch. Select 'Login' from the menu on the left. Login to MetaSearch with your IUPUI Network ID and password.

Below is the MetaSearch search page. Select your subject area from the dropdown menu.

Subject areas

Search boxes

Select up to 8 databases to search at one time using the checkboxes to the left of the database names, enter your search terms in the search boxes, then click GO.

Select articles by clicking on the e-shelf icon. This moves the citations into a generic folder. It is best to select articles available in full-text online through the Find It button, but this is not required.

No.	Rank	Author	Title	Year	Database	Actions
1		Adamsen, Pat	Classroom Literacy Assessment: Making Sense of What Students Know and Do.	2008	Professional Development (EBSCO)	<input type="checkbox"/> Find It
2		Adamsen, Pat	Designing Assessment for Mathematics.	2008	Professional Development (EBSCO)	<input type="checkbox"/> Find It
3		Adamsen, Pat	Integrating Science with Mathematics and Literacy: New Visions for Learning and Assessment.	2008	Professional Development (EBSCO)	<input type="checkbox"/> Find It
4		Milk, Lane B.	Online Assessment: Put Down Your Pencils.	2008	Professional Development (EBSCO)	<input type="checkbox"/> Find It
5		Gallant, Dorinda J.	Assessing Ethnicity: Equity for First-Grade Male Students on a Curriculum-Embedded Performance Assessment	2008	Education Full Text (Wilson)	<input type="checkbox"/> Find It
6		Roach, Andrew T.	Evaluating the Alignment among Curriculum, Instruction, and Assessments: Implications and Applications for Research and Practice	2008	Education Full Text (Wilson)	<input type="checkbox"/> Find It
7		Zimmerman, Barry J.	Mastery Learning and Assessment: Implications for Students and Teachers in an Era of High-Stakes Testing	2008	Education Full Text (Wilson)	<input type="checkbox"/> Find It
8		Amrein-Beardsley, Audrey	Methodological Concerns About the Education Value-Added Assessment System	2008	Education Full Text (Wilson)	<input type="checkbox"/> Find It
9		Tuttle, Harry Grover	Part 1: Digital Age Assessment	2008	Education Full Text (Wilson)	<input type="checkbox"/> Find It

1. To move the citations to a new or previously created folder, select the 'My MetaSearch' tab (in the grey menu bar). You are now in your e-Shelf area of MetaSearch.
2. Select 'Advanced'
3. Select the 'New Folder' icon  to create an e-Shelf folder for your citations or select from the Folder drop down menu to access your current folders. The name you give your e-Shelf folder is the name that will appear in Oncourse for that group of readings so you may want to name it by something that will make sense to the students (topic, project, or week etc.).
4. Check those citations from your Basket folder that you wish to move to your designated folder and click on the arrow keys to move them over.

Finish in Oncourse

1. Log into Oncourse using your IUPUI Network ID and passphrase.
2. Select the course for which you are creating a reading list.
3. From the left navigation bar, select 'Library Resources'
4. Under the Selected Readings (e-Shelf), select 'Edit' to turn on your MetaSearch e-Shelf folders.

Benefits:

- A major benefit to linking to course readings through Selected Readings is that you do not need to worry about copyright, because you are linking out to full-text articles available through the library.

Limitations:

- Not every library database is searchable through MetaSearch, which means not all full-text online articles available through the IUPUI Libraries can be linked to your course in this way.

Course Reserves

You can also link to University Library's Course Reserves through Oncourse. This may be especially beneficial if your course uses a book chapter or journal article not available from one of the IUPUI libraries online databases. *Note:* Your course must be activated in your University Library Course Reserves account in order to display. To use the University Library Course Reserves visit <https://reserves.ulib.iupui.edu/>

Once you have set up your course reserves through University Library:

1. Log into Oncourse using your IUPUI Network ID and passphrase.
2. Select the course for which you have course reserves through University Library.
3. From the left navigation bar, select 'Library Resources'.
4. Under Course Reserves, select 'Edit' to activate your course reserves for that class.

For help with any of the above, contact your University Library Subject Librarian (http://www.ulib.iupui.edu/libinfo/sub_librarians) or the Center for Teaching and Learning, 274-1300.
